

Equity & Income Portfolio of CEFs, Series 60

Combining Growth and Income for Enhanced Total Return Potential

For investors seeking to maximize their investment performance, Guggenheim believes it's important to focus on earning total return through both growth and income. The Equity & Income Portfolio of CEFs invests in shares of multiple closed-end funds believed to have the best opportunity to provide both capital appreciation and consistent dividends. When selecting closed-end funds for the Trust, a comprehensive multi-factor security evaluation is used to construct a well-diversified portfolio offering enhanced total return potential.

Security Selection

When selecting closed-end funds for inclusion in the portfolio Guggenheim Funds Distributors, LLC (the Sponsor) looks at numerous factors including, but not limited to:

Portfolio Holdings

Holdings are as of 6.5.2026 and subject to change.

Ticker	Name	Ticker	Name
AOD	abrdn Total Dynamic Dividend Fund	HTD	John Hancock Tax-Advantaged Dividend Income Fund

Covered Call	30.05%
U.S. Equity	23.75%
Global Equity	18.55%
U.S. Allocation	15.50%
Sector Equity	7.15%
Preferreds	5.00%

Investment Objective

The Equity & Income Portfolio of CEFs, Series 60 (Trust) seeks to provide total return that is comprised of current income and capital appreciation.

Key Considerations

- **High Income Potential:** The Trust offers the potential for a high level of monthly income. The Trust's historical annual dividend distribution is \$0.8427 as of 6.5.2026.¹
- **Opportunity for Discounts:** The Trust consists of funds that are trading at a discount relative to their peers and relative to their long-term average, which may result in higher total return potential.
- **Lower Leverage:** Lower leveraged closed-end funds may experience less volatility from the uncertainty surrounding interest rates. The Trust, based on its underlying holdings, has a relatively low weighted average leverage ratio.²

¹ See disclosure on page 2 (footnote 3) regarding the Historical Annual Dividend Distribution.

² Morningstar, 6.3.2026. Average U.S. Listed CEF Universe Leverage Ratio: 23.97 vs Equity & Income Portfolio: 11.35. The Weighted Average Leverage Ratio is the total value of the fund's outstanding leverage presented as a percentage of total leveraged assets.

Advantages of Closed-End Funds

Many closed-end funds are designed to periodically distribute income to shareholders. In addition, closed-end funds have historically traded at a discount to their net asset value and their structure allows for the employment of leverage. These features may help investors realize enhanced total returns.* Other advantages of closed-end funds include:

- Exchange listing
- Price visibility
- Intra-day trading
- Professional management

As a professionally selected, defined, and fixed portfolio of managed closed-end funds, the Trust may provide an extra degree of diversification for those investors seeking monthly income potential.**

* There is increased volatility associated with investing in leveraged funds.

** Despite broad diversification, it is important to note that certain closed-end funds selected for the portfolio invest in bonds rated below investment grade (sometimes referred to as "junk bonds"). These bonds are considered speculative and are traditionally subject to greater credit risk and therefore their risk of default may be greater than normal. As such, it is possible that the income streams provided by these closed-end funds may experience less stability than other investments.

PORTFOLIO SUMMARY

Inception Date	6.8.2026
Termination Date	6.7.2028
Initial Offer Price	\$10.00
Number of Issues	15
Historical Annual Dividend Distribution³	\$0.8427
Distributions	25th day of each month commencing on 6.25.2026, if any

Reinvest	40178R797
Fee/Cash	40178R805
Fee/Reinvest	40178R813
Ticker	CCEEJX

³ The Historical Annual Dividend Distribution (HADD) is as of the day prior to trust deposit and subject to change. There is no guarantee the issuers of the securities included in the Trust will declare dividends or distributions in the future. The HADD of the securities included in the Trust is for illustrative purposes only and is not indicative of the Trust's distribution rate. The HADD is the weighted average of the trailing twelve-month distributions paid by the securities included in the portfolio and is reduced to account for the effects of fees and expenses, which will be incurred when investing in the Trust. The HADD will vary due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in Trust expenses or the sale or maturity of securities in the portfolio. ⁴ Fee/Wrap-based accounts will not be assessed the deferred sales charge for eligible purchases and must purchase units with a Fee-based CUSIP. For unit prices other than \$10, percentage of the C&D fee will vary. ⁵ The deferred sales charge (DSC) is a fixed amount and will be deducted in monthly installments on the last business day commencing January 2027 and ending March 2027 or upon early redemption. For unit prices other than \$10, percentages of C&D fees, and DSCs will vary but in no event will the maximum sales charge (S.C) exceed the total S.C. Early redemption of units will still cause payment of the DSC. However, an initial sales charge, which is equal to the difference between the maximum S.C and the sum of any remaining deferred S.C charges and C&D, will be charged if the price paid for units exceeds \$10 per unit or you purchase units after the first DSC payment has been assessed. ⁶ Estimated Organization Expenses are assessed on a fixed dollar amount per unit basis, therefore, actual organization costs may be more or less than estimates. For additional information on organizational costs and potential caps, please see the prospectus. ⁷ Trust operating expenses include fees for administration, bookkeeping, the trustee, sponsor, and evaluator. This expense also includes an estimated Trust operating expense based upon an estimated trust size. If the Trust does not reach or falls below the estimated size, the actual amount of the operating expenses may exceed the amount reflected. Please see "Fees and Expenses" in the Trusts prospectus for additional information.

The Equity & Income Portfolio of CEFs, Series 60 is a Unit Investment Trust.

RISK CONSIDERATIONS: As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved. The Trust also might not perform as well as you expect. This can happen for reasons such as these: • Securities prices can be volatile. The value of your investment may fall over time. Market values of the Trust's securities fluctuate in response to various factors affecting an issuer. Events including but not limited to war, terrorism, natural and environmental disasters, public health emergencies, political and diplomatic events both domestic and abroad, are impossible to predict and may adversely affect the economy, various markets and issuers, which may negatively impact the performance of the Trust and the Trust's ability to achieve its investment objectives. • The Trust includes Closed-End Funds (CEFs), which are subject to various risks, including management's ability to meet the CEF's investment objective and to manage the CEF's portfolio during periods of market turmoil and as investors' perceptions regarding CEFs or their underlying investments change. CEFs are not redeemable at the option of the shareholder and they may trade in the market at a discount to their net asset value. CEFs may also employ the use of leverage which increases risk and volatility. • The CEFs are subject to annual fees and expenses, including a management fee. Unitholders of the Trust will bear these fees in addition to the fees and expenses of the Trust. • Certain CEFs held by the Trust invest in: – Call options. The call writing portion of the investment strategy of the CEFs may not be successful. The value of a call option may be adversely affected by many factors, including but not limited to the CEF's adviser's ability to successfully implement the CEF's investment strategy and if the market for the option becomes less liquid; – Common stocks, whose prices fluctuate for several reasons including changes in investors' perceptions of the financial condition of an issuer, changes in the general condition of the relevant stock market; – Foreign securities, which will be more volatile than U.S. securities due to such factors as adverse economic, currency, political, social or regulatory developments in a country; – Securities issued by companies headquartered or incorporated in countries considered to be emerging markets, which may be exposed to greater volatility and market risk, such as investment and trading limitations, liquidity concerns, political uncertainties and dependence on international trade and development assistance; – Securities whose value may be dependent on currency exchange rates. The U.S. dollar value of these securities may vary with fluctuations in foreign exchange rates; – Securities issued by small- and mid-cap companies, which involve more investment risk due to limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments. • The value of the fixed-income securities in the CEFs will generally fall if interest rates, in general, rise. Typically, fixed-income securities with longer periods before maturity are more sensitive to interest rate changes. • A CEF or an issuer of securities held by a CEF may be unwilling or unable to make principal payments and/or to declare distributions in the future, may call a security before its stated maturity, may reduce the level of distributions declared, or may suspend distributions during the life of the Trust. This may result in a reduction in the value of your units. • At any point in time, the financial condition of a CEF or an issuer of securities held by a CEF may worsen, resulting in a reduction in the value of your units. • Economic conditions may lead to limited liquidity and greater volatility. • The Trust may be susceptible to potential risks through breaches in cybersecurity. • The Trust is subject to risks arising from various operational factors and their service providers. Although the Trust seeks to reduce operational risks through controls and procedures, there is no way to completely protect against such risks. **Please see the Trust prospectus for more complete risk information.**

Unit Investment Trusts are fixed, not actively managed and should be considered as part of a long-term strategy. Investors should consider their ability to invest in successive portfolios, if available, at the applicable sales charge. UITs are subject to annual fund operating expenses in addition to the sales charge. Investors should consult an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available, and with the purchase or sale of units. Guggenheim Funds Distributors, LLC does not offer tax advice.

This material is not intended as a recommendation or as investment advice of any kind, including in connection with rollovers, transfers, and distributions. Such material is not provided in a fiduciary capacity, may not be relied upon for or in connection with the making of investment decisions, and does not constitute a solicitation of an offer to buy or sell securities. All content has been provided for informational or educational purposes only and is not intended to be and should not be construed as legal or tax advice and/or a legal opinion. Always consult a financial, tax and/or legal professional regarding your specific situation.

Read the Trust's prospectus carefully before investing. It contains the Trust's investment objectives, risks, charges, expenses and other information, which should be considered carefully before investing. Obtain a prospectus at GuggenheimInvestments.com.
